SWEDEN - INDIA BUSINESS GUIDE
2014
Disclaimer:
The Embassy of Sweden, Consulate General of Sweden, Business Sweden and Swedish Chamber of Commerce India have made every effort to provide a comprehensive directory of companies with substantial Swedish interests represented in India, and companies with substantial Indian interests represented in Sweden. However, the Embassy cannot guarantee that the list is exhaustive. All company information contained in this directory has been provided by the companies themselves. The financial data on the companies in this catalogue refer to the year 2013-2014.

Swedish companies create jobs in India! Nearly 150,000 jobs are directly created by Swedish companies present in India. The indirect numbers are much higher, including sub-contractors, farmers and service providers.

We are pleased to present the seventh edition of the Sweden-India Business Guide. It provides contact details of the Swedish companies established in India and the Indian companies in Sweden. Here you will also find useful information how to trade with and invest in both countries.

In this edition of the Business Guide, some new elements have been included - the geographical spread of Swedish companies across India and a state-wise breakup of employment generated by them.

As in the past, we stand ready to facilitate the growing of contacts between partners in Sweden and India. We hope that this Business Guide will continue to contribute to even stronger links between us!

Sweden is consistently ranked as one of the most competitive economies in the world by the World Economic Forum. It is known for its rich natural resources, innovations, high-tech companies and caring society. Freedom of expression, gender equality, a deregulated economy and reformed central government finance combined with an efficient welfare and social security system have contributed to the societal and economic development.

In an international comparison, Sweden is a very open economy - to international trade and investments. Exports account for almost half of Swedish GDP, consisting largely of manufactured goods, such as vehicles, machinery, pharmaceuticals and forest industry products. Trade in services is large and growing, especially in areas of business services, travel and transportation. Asia is an increasingly important export market for Swedish companies, even larger than the North- and South American markets combined. Imports to Sweden from Asia have also grown over the years.

Sweden is among the leading research nations in the world. As an advanced industrial nation, research plays a key role for economic development as well as for society at large. Innovation and co-creation are important for tackling major challenges. Today, Sweden ranks as one of the most innovative countries in the world.

It has a long history of international commitment to pursuing active global cooperation on sustainable development. This has led to Sweden being in the forefront of developing new environmental technologies and sustainable system solutions. This includes renewable energy, green buildings, waste management, air and water treatment, sustainable fuels and battery-driven vehicles. Swedish industries are in particular innovative also when it comes to life science, IT/telecom, automotive industry, mining and pulp and paper.

Sweden is a strong player in the cultural and creative industries. These industries play an increasingly important role in the growth of the Swedish economy and are driving forces for innovation in other sectors of society and industry as well. Creative industries include professionals and entrepreneurs within fashion and design, film, communication, literature and music, performing arts, computer games and gastronomy.

Swedish citizens are encouraged to take the chance and start new businesses, which is one of the key factors to the development of many successful Swedish companies. According to the global Entrepreneurship monitor (GEM) 2014, the number of entrepreneurs in Sweden have doubled since 2006.
THE FIRST WAVE OF SWEDISH COMPANIES TO INDIA ARRIVED IN THE BEGINNING OF THE 20TH CENTURY, WITH COMPANIES LIKE ERICSSON, SKF, SWEDISH MATCH AND ASEA (LATER TO BECOME ABB). DIPLOMATIC RELATIONS WERE ESTABLISHED IN 1948, THE YEAR AFTER THE COUNTRY BECAME INDEPENDENT.

After independence, in 1957, the Indian prime minister, Jawaharlal Nehru, visited his Swedish counterpart, Tage Erlander. The two political leaders agreed that Sweden and India had a lot in common and would profit from collaboration. A large area of land was allocated to Swedish companies in the city of Pune, which was a strategically good location considering the proximity to India’s commercial center in Mumbai. In the 1960-70s Pune became an important industrial hub, where a second wave of Swedish companies like Alfa Laval, Tetra Pak, Sandvik and Atlas Copco were established.

The third wave of Swedish companies entered India during the 1980s and 1990s with among others Volvo and Perstorp. Companies with large purchasing organizations, such as IKEA and H&M, also started doing business in India. In the 2000s Volvo Cars and Scania established subsidiaries in India. They were accompanied by an influx of small and medium sized companies, such as Systemair and Rotec, to name a few.

India has become an increasingly important market for Swedish companies. Trade between Sweden and India has increased significantly over the last decade and a steadily growing number of Swedish companies have established themselves here.

A number of Indian companies have also invested in Sweden, particularly in the IT-sector. In total there are more than 50 Indian companies in Sweden today. Sweden has attracted a number of Indian global industrial leaders like Aditya Birla Group, Bharat Forge, Tata Group and Wipro. There have been substantial investments in the field of ICT, Life Sciences and Materials technologies. Global leaders like TCS, Wipro, Infosys, Cognizant, HCL Technologies, Cyient, L&T Infotech, Cadila Pharma, Kemwell Pharma and Biocon have been present in this region for many years.

Together, they employ more than 2000 people in Sweden and the presence is expected to increase rapidly as these firms are looking at expanding and hiring locally to tap the high-potential Nordic market.
If you want to visit Sweden and you are not a citizen of the EU/EEA, you may need a visa. A visa gives you permission to enter and stay in Sweden for a short period. It is valid throughout the Schengen area, but you apply to the country that is the main destination for the journey.

To improve the service available to those applying for a visa, the Embassy cooperates with VFS Global. The easiest way to apply for a visa is to visit one of the Swedish Visa Application Centres (operated by VFS Global) which are currently available in seven cities; New Delhi, Mumbai, Kolkata, Chennai, Bangalore, Hyderabad and Pune.

The handling time for visa applications is 10 to 12 days, and the passport is thereafter returned to the applicant by VFS Global. The Embassy however strongly recommends applicants to apply at least 3 weeks in advance of intended departure in order to avoid any inconveniences.

You can also submit your application in person to the Embassy of Sweden in New Delhi during the opening hours of the Visa section. A decision on your application will be available after 15 days.

You can find more information regarding visas on the website of the Embassy and on the VFS Global website:

http://www.swedenabroad.com/New-Delhi/
http://se.vfsglobal.co.in

For more information on residence- and work permits, please visit the website of the Swedish Migration Board: http://www.migrationsverket.se

Swedish passport holders and Non-Swedish passport holders (resident in Sweden) are required to apply for visa for India by downloading the Visa Application form from the website of Cox and Kings Global Services Sweden AB (http://www.in.ckgs.se) and on the Embassy website. This form is to be filled up on the website, a printout taken, signed and submitted to Cox and Kings Global services Sweden AB with all requisite enclosures.

You can find more information on the Embassy website:
http://www.indianembassy.se/
Supporting Organisations

Useful organisations when doing business in

SWEDEN & INDIA
**EMBASSY OF SWEDEN NEW DELHI**

The Embassy of Sweden in New Delhi is responsible for strengthening contacts between Sweden and India within a wide range of areas in both the public and private sector. Among other things, the Embassy promotes trade and economic cooperation with particular focus on business promotion. It is also responsible for spreading information about Sweden in India. It provides support to Swedish citizens in consular matters and issues visas and permits for Indian and third country national citizens. The Ambassador is also accredited to Sri Lanka, Nepal, Bhutan and the Maldives.

The Swedish Chamber of Commerce India (SCCI) is an independent, member-based network, with a mission to enable, promote and encourage Swedish companies to promote long-term and sustainable business in India. The Chamber organizes Leader’s Forums and Knowledge Seminars and undertakes initiatives to develop the value proposition of the Swedish Business community. It functions as a hub for member companies to access information, support and develop their networks. The Chamber conducts an annual Business Climate Survey, a tool for measuring how Swedish companies perceive opportunities and challenges doing business in India.

The Sweden India Business Council (SIBC) is the first choice network for growing business between Sweden and India. Their mission is to facilitate business and choice of strategy for our members by increasing knowledge and exchange of experiences, and providing business network and give access to relevant private and public institutions. SIBC runs over 20 professional activities per year including round table meetings and other knowledge based activities including producing its own magazine - INSIGHT Sweden India. SIBC was established in May 2003 and is owned by its members, ranging from large companies to SME’s. SIBCs main target group are decision makers in Sweden.

Open Trade Gate Sweden is a one-stop information centre for exporters in developing countries. The overall goals are to increase market access for developing countries and to strengthen the capacity to export to Sweden. Open Trade Gate Sweden provides information on trade rules, regulations and requirements for the Swedish and European Union markets. The service is free of charge. Open Trade Gate Sweden forms part of the National Board of Trade, Sweden’s governmental agency for international trade and trade policy.

Swedish Trade Federation is the main organisation in Sweden for importers, wholesalers, suppliers and retailers. The Federation has 12,000 members representing a total of 23,000 workplaces. The members of the Federation stand for the major share of Swedish domestic trade and imports. The Swedish Trade Federation is the largest member organisation of the Confederation of Swedish Enterprise (Svenskt Näringsliv).

FEDERATION OF INDIAN CHAMBERS OF COMMERCE & INDUSTRY

Established in 1927, FICCI is the largest and oldest apex business organisation in India. Its history is closely interwoven with India’s struggle for independence, its industrialization, and its emergence as one of the most rapidly growing global economies. FICCI has contributed to this historical process by encouraging debate, articulating the private sector’s views and influencing policy. A non-government, not-for-profit organisation, FICCI is the voice of India’s business and industry. FICCI draws its membership from the corporate sector, both private and public, including SMEs and MNCs; FICCI enjoys an indirect membership of over 2,50,000 companies from various regional chambers of commerce.

### QlikTech

QlikTech was founded on the belief that Business Intelligence (BI) should be about business users. Traditional BI solutions have become bloated, complex software stacks, leaving users confused and frustrated. For 18 years, QlikTech has focused on simplifying decision-making for business users across organizations. Qliktech pioneered new approaches to accessing, managing, and interacting with data. The QlikView Business Discovery platform is recognized as a ground breaking solution. Combined with a relentless focus on customer success and a vibrant, passionate user community, it’s no wonder more than 19,000 companies in over 100 countries use QlikView, with an industry-leading 96% satisfaction rate.

**QUEST Global Engineering** is a diversified global engineering services company. It helps its clients to cut product development costs, shorten lead times, extend capacity and maximize engineering resources availability by providing support across the complete product life cycle from design and modeling through analysis, prototyping, automation, data documentation, instrumentation and controls, embedded systems development, manufacturing support and vendor management.

**TCS** has emerged as a strong service provider in the Nordic region, offering clients and employees the opportunity to work with a global player with a strong local foundation. TCS has offices in all the Nordic countries - Stockholm, Copenhagen, Oslo, Helsinki and Reykjavik. TCS offers its clients superior cost-effective business solutions through a flexible and transparent service delivery model. Several prominent Nordic companies have benefited from TCS’s unique service offerings including Nokia, Ericsson, TDC, ABB, Telenor, NETS, SAS, and DNB.
TechMahindra represents the connected world, offering innovative and customer-centric IT services and solutions enabling Enterprises, Associates and the Society to Rise. TechMahindra is a USD 3.1 Bn company with 89,000+ professionals across 51 countries, providing services to 629 global customers including Fortune 500 companies. The company’s Consulting, Enterprise and Telecom solutions, platforms and reusable assets connect a number of technologies, delivering tangible business value to our stakeholders. It is part of the USD 16.5 billion Mahindra Group employing 180,000 people in over 100 countries in key industries, enjoying a leadership position in tractors, utility vehicles, after-market, information technology and vacation ownership.

The Future of Mining. This Way!

With a strong culture, distinctive team spirit, great service and remarkable products, we are the mining industry thought leader. We show the way to innovation and solutions that will be part of The Future of Mining.

Safety is key. Productivity is vital. Service is crucial. Environment is priceless.

All these considerations play a part in everything we do, from research and product development to on-site service.

Sandvik Asia Pvt. Ltd. Sandvik Mining, Mumbai - Pune Road, Dapodi, Pune - 411 012. India. Tel: 020 - 27104800 Fax: 020 - 27103133

It's This Way: www.mining.sandvik.com

Bharat Forge

As Bharat Forge evolves from a leading auto component supplier to a world-class technology-driven engineering and capital goods company, our vision is clear. We're expanding and strengthening our position on the global stage, balancing commercial ambitions with environmental concern.

Propelling our dynamic evolution is Innovation. Our R&D team with over 100 engineers has been developing technologies to minimize the carbon footprint and produce light weight products, that translate into lower energy consumption. It's helped us develop high performance, high value, critical & safety products for both our automotive and non-automotive clientele - ensuring success and sustainability today and into the future.

Bharat Forge Limited, Mundhwa, Pune - 411 036, INDIA, Tel: +91-20-26822387,

You can find traces of our products everywhere – in your garden hose, in your tyres and in the asphalt on the roads. Yes, even in the colour used to print this ad.

The fact is our special oils improve the properties and functions of thousands of everyday products. But that’s not all.

In our product areas, we are pioneers in developing oils with less impact on health and the environment. Every day our specialists work with

our customers to get even more out of oil’s good properties. This is why we invest heavily in research.

Where most oil companies see oil as a source of energy – a consumer product that disappears after it’s used – we use oil to create lasting value.

Welcome to Nynas!

www.nynas.com
Dedicated all the way.

Your Scania belongs on the road. Our job is to keep it there.

We think of your business as a whole. We offer optimized products and solutions, deliver vital parts, tailor your maintenance programme, train your drivers to save fuel, and help finance your vehicles. Scania has everything you need to keep your business moving forward.

As your needs change, we’ll change with you. That’s why you can expect more from us. All the way.

For more information about Scania, please contact your Scania dealer or visit www.scania.in.

At Saab, we believe that close co-operation always leads to better solutions.

For seventy five years, Saab has helped develop the Swedish defence industry into one of the most cutting-edge, innovative and cost-effective defence solutions providers in the world. Across the world in countries such as Brazil, Thailand and Australia, our partnerships have helped us constantly deliver solutions that help keep their country secure. At a reasonable cost.

In India, we're working with Tech Mahindra to develop the next generation of defence systems. With Aequus to manufacture complex airframe assemblies. And with HAL to build Electronic Warfare systems for the Dhruv Helicopter and many more such partnerships. Because we believe that only if we work closely with the domestic industry can we continue to perfectly address our customers’ needs. And develop an indigenous defence industry of global dimensions.

Saab’s thinking edge delivers new and innovative ways to share ideas and values.
For both Saab and its partners shared knowledge is empowering.
